

## Bridge structures

Kierunek:

## Budownictwo

### Karta Opisu Przedmiotu

Name of the subject				Subject code		Year / semester	
Bridge structures <i>Konstrukcje mostowe</i>						III	05
Subject		Profile		Level of education			
Obligatory		General academic		Full-time, second degree – S2			
Type of classes						ECTS	
Lecture	Practice	Laboratory	Project	Seminar	Exam		
30	-	-	30	-	YES	6	
Department conducting subject:	<i>Department of Civil Engineering</i> Tel: +48 (34) 325 09 04 mail: <a href="mailto:roman.gackowski@pcz.pl">roman.gackowski@pcz.pl</a>						
Teachers conducting subject:	PhD. Eng. Roman Gaćkowski						

<b>I. CARD OF COURSE</b>	
<b>OBJECTIVE OF THE SUBJECT</b>	
<b>C1</b>	Understanding the essence of bridge structures as engineering.
<b>C2</b>	Acquires the design skills and calculation of bearing capacity of advanced cross sections bridge elements by ULS and SLS.
<b>C3</b>	Design of bridge structures using the acquired knowledge in the field of bridge engineering with a full-time first degree.
<b>PREREQUISITES FOR KNOWLEDGE, SKILLS AND OTHER COMPETENCE</b>	
<b>1</b>	Basic knowledge of concrete technology, properties of physical, chemical, mechanical, concrete and reinforcing steel.
<b>2</b>	Basic knowledge of theoretical mechanics and strength of materials and the ability of calculating the ratios of strength sections.
<b>3</b>	Messages from structural mechanics and ability to solve advanced static systems.
<b>4</b>	Knowledge of concrete structures, Mechanics of soil, Fundamentals of bridge structures.
<b>5</b>	Ability to use standard EC0, EC1, EC2 and professional literature.
<b>6</b>	Knowledge of and ability to use the software for the calculation of static and strength of engineering structures.
<b>LEARNING OUTCOMES</b>	
<b>EK1</b>	has an orderly, theoretically founded general knowledge necessary to understand advanced work of bridge construction.
<b>EK2</b>	has a detailed knowledge useful for solving advanced engineering tasks in the field of bridge construction.
<b>General skills</b>	
<b>EK3</b>	the student is able obtain information from the literature and other materials, including catalogs of manufacturers of components for bridge structures in the Polish and English language.
<b>EK4</b>	the student able to individually solve advanced tasks.
<b>Fundamental engineering skills</b>	
<b>EK5</b>	the student able to use computer programs to perform advanced calculation models of bridge structures.
<b>Skills directly related to solving an engineering tasks</b>	
<b>EK6</b>	the student able to correct an analysis advanced work of bridge structures and on this fundamentals to determine the scope of the calculation.

<b>Competence of personal and social</b>		
<b>EK7</b>	the student able to think and act creatively and systematically doing the design of a bridge structures.	
<b>CONTENTS OF COURSE</b>		
<b>Form of teaching – Lectures</b>		<b>Number of hours</b>
<b>W01</b>	General rules for the bridge structures.	2
<b>W02</b>	Materials for the construction of bridges.	2
<b>W03</b>	Light of the bridges. Design using computer methods.	2
<b>W04</b>	Designing communication of bridges.	2
<b>W05</b>	Formation of cross-sections and accessories of bridges.	2
<b>W06</b>	The loads acting on the bridges.	2
<b>W07</b>	Calculation models and dimensioning of bridges using computer methods.	2
<b>W08</b>	Abutments of bridge. Design using computer methods.	2
<b>W09</b>	Piers of bridge. Design using computer methods.	2
<b>W10</b>	Bearings of bridge. Design using computer methods.	2
<b>W11</b>	Expansion joint cover of bridge.	2
<b>W12</b>	Design and calculation of steel bridges using computer methods.	2
<b>W13</b>	Design and calculation of composite bridges using computer methods.	2
<b>W14</b>	Design and calculation of timber bridges using computer methods.	2
<b>W15</b>	Building and maintaining bridges.	2
<b>TOTAL:</b>		<b>30</b>

<b>Form of teaching – Design</b>		<b>Number of hours</b>
<b>Pr01</b>	Introduction to use of standards and regulations.	2
<b>Pr02</b>	Edition theme of the design. The work schedule.	2
<b>Pr03</b>	Summary of loads. Finding the element dimensions of bridge.	4
<b>Pr04</b>		
<b>Pr 05</b>	The construction of calculation models. Static calculations of the bridge.	6
<b>Pr 06</b>		
<b>Pr 07</b>		
<b>Pr 08</b>	Strength calculation of bridge elements based on static calculations.	4
<b>Pr 09</b>		
<b>Pr 10</b>	Calculation of bearings and expansion joints of bridges.	2
<b>Pr 11</b>	The preparation of complete documentation of the design descriptive.	4
<b>Pr 12</b>		
<b>Pr 13</b>	Preparation of complete technical drawings of the design.	4
<b>Pr 14</b>		
<b>Pr 15</b>	Assessment of the design.	2
<b>TOTAL:</b>		<b>30</b>

<b>TOOLS OF TEACHING</b>	
1.	Lecture: presentation of multimedia content lectures.
2.	Design: multimedia presentation, discussion.
3.	Materials Copyright lecturers. Consultation.
4.	Literature.
5.	Standards of work bridge structures EC0, EC1, EC2
6.	Software for the calculation of static and strength of engineering structures.

<b>METHODS OF ASSESSMENT: (F - FORMATIVE; P - SUMMARY)</b>	
<b>F1</b>	Assessment independently prepare for classes.

<b>F2</b>	Assessment of the implementation of the design outside the classroom.
<b>P1</b>	Assessment develop a calculation model of the bridge.
<b>P2</b>	Assessment of analysis results of calculations internal forces and combinatorics of loads.
<b>P3</b>	Assessment of the implementation documentation descriptive and graphic of the bridge.

#### WORKLOAD OF STUDENT

O.n.	Activity	Average number of hours/ECTS to complete the activity	
		[hours.]	[ECTS]
1.	Hours of classes organized by the universities - <b>Lectures</b> .	30	6
2.	Contact hours of teacher connected with lectures.	30	
3.	Introduction to with the indicated literature.	30	
4.	Hours of classes organized by the universities - <b>Design</b> .	30	
5.	Contact hours of teacher connected with design.	30	
6.	Implementation of the design.	30	
<b>TOTAL:</b>		<b>180</b>

#### MATRIX OF IMPLEMENTATION EFFECTS OF EDUCATION FOR DIRECTION

The effect of learning	The reference given effect to the effects defined for the entire program (PEK)	Objectives of the course	Program content	Tools of teaching	Method for assessing
EK1	KBI_W02, KBI_W03	C1, C2, C3	W01÷W06, W08÷W09 Pr01÷Pr03	1, 2, 3, 4	F1, F2, P3
EK2	KBI_W04	C1, C2, C3	W07÷W15, Pr01÷Pr03	1, 2, 3, 4	F1, F2, P3
EK3	KBI_U01	C1, C2, C3	W01÷W02, W05÷W15, Pr01÷Pr10, Pr14÷Pr15	1, 2, 3, 4	F1, F2, P1, P2
EK4	KBI_U03	C2, C3	Pr03÷Pr05, Pr07, Pr09	2, 3, 4, 5	P1, P2, P3
EK5	KBI_U04	C2, C3	Pr05÷Pr12	2, 3, 4, 5	P2, P3
EK6	KBI_U04	C2, C3	Pr05÷Pr12	2, 3, 4, 5	P2, P3
EK7	KBI_K01, KBI_K02	C2, C3	Pr02÷Pr04, Pr11÷Pr15	2, 3, 4, 5	P1, P2, P3

#### II. METHODS OF ASSESSMENT – DETAILS

MARKS	LEARNING OUTCOME
<b>EK-01</b>	
2,0	The student knows only the basic terms relating to bridges and has a cursory knowledge of dimensioning of bridge structures.
3,0	The student completed the knowledge of new terminology and symbols for the construction of bridges and general knowledge of advanced methods for modeling bridge structures.
3,5	The student can explain in further detail the work of any of the bridges and the loads acting on them. He knows the advanced part modeling bridge structures.
4,0	The student can explain in further detail the work of any of the bridges and the loads acting on them. He knows the advanced methods of modeling design.
4,5	The student is able to partially put into practice designed bridge structures using advanced computational methods and partly to identify environmental hazards, know methods to prevent their effects.
5,0	The student is able to use it in practice bridges designed using advanced computational methods and identify environmental hazards, know methods to prevent their effects.
<b>EK-02</b>	
2,0	The student knows the principles of modeling and briefly the work of individual elements of bridge structures.
3,0	The student knows the principles of modeling and operation of components of bridges but has trouble with their interpretation, knows the rules of dimensioning briefly in bridge structures.
3,5	Can partially correctly perform and interpret advanced computational models of bridge structures and to determine their application, knows the rules of dimensioning individual components of bridges.
4,0	Able to properly perform and interpret advanced computational models of bridge structures and to determine their application, knows the rules of dimensioning individual components of bridges.
4,5	The student knows the partially advanced principles and objectives of the calculation of bridge structures by ULS and SLS, and understand their importance.
5,0	Advanced student knows in detail the principles and objectives of bridge structures by calculating the ULS and SLS, and understand their importance.
<b>EK-03</b>	

2,0	The student knows the basic sources of literature needed for the design of bridges.
3,0	The student knows the applicable standards and can use them in the design (EC0, EC1, EC2).
3,5	The student is able to partially take advantage of all standards and link them throughout the process of design of bridges (EC0, EC1, EC2).
4,0	The student is able to use all of the standards and link them throughout the process of design of bridges (EC0, EC1, EC2).
4,5	Moreover the student completed message in the standards of knowledge given in the literature but can't fully exploit it.
5,0	Moreover the student completed message in the standards of knowledge given in the literature.
<b>EK-04</b>	
2,0	The student are unable to perform work on the design and don't know the advanced methods of calculation of bridge structures.
3,0	The student is able to provide a general outline of the design, requires the control to the design at the initial stage, he can partially perform advanced computational models of bridges.
3,5	The student is able to partially identify the issues made in implementing the design, but not able to use the recommendations of code. Able to perform partial advanced computational models.
4,0	Moreover the student is able to identify complex issues in implementing the design, but not able to use the recommendations of code. He can perform advanced computational models.
4,5	The student is able to identify the issues advanced in implementing the design, but it can't fully utilize the recommendations of code.
5,0	The student is able to identify the issues advanced in implementing the design and is able to use the recommendations of code.
<b>EK-05</b>	
2,0	The student isn't aware of what to create the correct procedures and computational models.
3,0	The student can build procedures and computational models but has difficulty in asking loads on structures.
3,5	The student is able to partially build procedures and computational models of the bridge structure. He can ask properly load on structures. Has difficulty in interpreting the results of static calculations.
4,0	The student can build procedures and computational models of the bridge structure. He can ask properly load on structures. Has difficulty in interpreting the results of static calculations.
4,5	The student can individually build advanced procedures and computational models, ask properly load but has trouble performing the correct analysis of the results of static.
5,0	The student can individually build advanced procedures and computational models, ask properly load and perform static analysis of the results.
<b>EK-06</b>	
2,0	The student doesn't understand the specifics of the construction of bridges.
3,0	The student is able to identify and understand some technical issues occurring in the design.
3,5	The student identifies and partially understand the technical issues occurring in the design.
4,0	The student identifies and understands the technical issues occurring in the design.
4,5	The student is able to partially fix addition compounds with the work of construction.
5,0	The student is able to establish relationships in addition to the work of construction.
<b>EK-07</b>	
2,0	The student performs tasks assigned to him carelessly without the commitment and with delay.
3,0	The student performs tasks with commitment, on time but the share classes is passive.
3,5	Moreover the student actively participates in the activities but it isn't creative.
4,0	Moreover the student takes an active part in the activities and partly creative.
4,5	Moreover the student takes an active part in classes and being creative.
5,0	Moreover the student shows creativity and originality.

### III. OTHER USEFUL INFORMATIONS ABOUT THE COURSE

1.	Information where the student can see the presentations to classes, support materials and literature: <i>According to the type of materials - in the classes didactic, in the room of teacher, in the library of the university and faculty.</i>
----	---

2.	Information on the place of event classes:
	<i>Showcased at the Faculty of Civil Engineering, Faculty of Civil Engineering website.</i>
3.	Information on the date of the course (day of week / time):
	<i>Showcased at the Faculty of Civil Engineering, Faculty of Civil Engineering website.</i>
4.	Information on the consultation (hours + location):
	<i>The timetable posted on the door of Room 89 at the Faculty of Civil Engineering at. Academic 3 (third floor).</i>
